

The First Connected & Social Dashcam

recSMART is the first connected and social dashcam. Equipped with built-in GPS, Wi-Fi connectivity and a wide angle camera, it seamlessly connects to your smartphone and records your driving journeys in full HD. Its magnetic mounting bracket allow you to easily remove it from the car without touching the original setup. Thanks to its free app, you can now share your best moments on the road with the worldwide RoadEyes community or with your social networks!

Automatic & continuous recording

Always on, recSMART records your journey as soon you're turning on your engine. Never miss a moment or an event. recSMART manages automatically your storage and overwrites oldest recordings when your microSD is at full capacity.

Travel with connected drivers

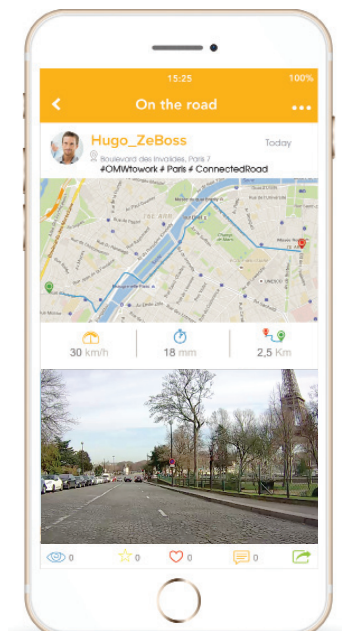

Never alone in your car! Whether your crossing a wonderful national park or simply driving up to your favorite ski resort, you can simply share amazing HD footages with the RoadEyes community straight from your smartphone and enjoy around the world members' contributions

Wireless snap remote

Wildlife is just crossing the street in front of you, an accident just happened to the preceding car, Never miss the instant thanks to the RoadEyes wireless snap remote. Installed right at your fingertip you can instantly press the button to take a snapshot and secure a 10 seconds segment of video on your memory card

Travel through the eyes of connected drivers

Compatible with iOS and Android, the RoadEyes App is your best companion to share your journey with your friends on your social networks as well the entire RoadEyes community. Simply travel around the world and visit the most wonderful roads and breathtaking spots with the eyes of all recSMART cameras connected around the globe.
